

# Auto Grip 3in1 Gear Puller

## Features

- ◆ The jaws on the gear puller can be operated with 2 or 3 jaws with internal or external pulling action.
- ◆ Maximum force of 1.2T(76-102 mm) and 2T(78-178 mm) offers excellent ability to remove damaged or rusty bearings easily.
- ◆ Great working capacity from 76-102 mm(3"-4") and 78-178 mm(3"-7") of compatibility with a wide range of bearing sizes.
- ◆ Self-Returning legs make it NO RISK for the puller to escape from the bearing.
- ◆ High grade level of CR-V material made with heat treatment which suits even in harsh industrial settings.

## Operating Tips:

Simply unscrew the knurled screw cap to release spring and jawcover, unhook the jaws and replace as necessary. Replace cover plate and tighten spring with knurled screw.
